

“I HATE CHINESE!”

Sounds familiar? We can help.

By Lee Hann Yang (Founder of WINK to LEARN Chinese program)

Yes. It's tough.

Our kids in Singapore today have a tough time learning Chinese. Everything is in English – signboards, menus, road signs, brochures and etc. Even parents are no longer conversing in Mandarin with their kids.

So what should I do as a parent?

The degree to which a child can fulfil her potential depends on the quality and frequency of stimulation she receives from birth.

The best people to provide this stimulation are the child's mother and father, because no one knows the child better or adores the child more than her parents. Parents shower love and bring joy to the child's learning journey.

Start your child on WINK to LEARN Chinese Flashcard program as young as possible. Learn together with them.

Flashcards Method – Proven over 45 years of research in USA

The method of teaching children with flash cards was pioneered by Glenn Doman, founder of the Institutes for the Achievement of Human Potential (IAHP), a non-profit organization that teaches parents how to maximize the potential of their brain-injured or normal child.

IAHP believes that most people get nowhere near to realising their full genetic potential and every child born has a greater potential intelligence than Leonardo da Vinci ever used in his lifetime.

Children, and especially babies, learn at an extremely rapid pace – much faster than adults; much faster even than adults can imagine. WINK to LEARN Chinese DVD program keeps a child's attention with different series of thematic fast-moving flashcards.

WINK to LEARN creates a breakthrough!

WINK to LEARN Flashcard DVDs use bright colours to separate different Chinese radicals. **This improves memorization by 25%!**

Spare your child 5 mins a day

WINK to LEARN DVD Flashcard lessons are intentionally short to captivate your child's attention and sustain their interest. Your child is able to read and recognize more than 700 words.

More than words

The first 4 levels help your child to recognise and read Chinese words.

5th and 6th levels teaches your child to form phrases and construct sentences using the words learnt in the first 4 levels.

WINK to LEARN Flashcard DVDs help your child to converse confidently in Chinese after six months of learning fun.

Now or never!

Research has proven children's accelerated learning window closes by age 6. Once closed, opportunity will never return. Start your child on WINK to LEARN Flashcard DVD program as young as possible. 5 minutes a day lays a firm foundation and creates a passion in Chinese for life.

- \$129 for 6-DVDs
